PROFESSIONAL SUMMARY

Entry-level IT Specialist / Data Encoder with a Bachelor of Science in Computer Engineering. Strong foundation in Linux administration, networking fundamentals, and IT support. Hands-on experience through internship and academic projects involving system setup, troubleshooting, automation, and database-backed applications. Adept at documentation, problem isolation, and supporting users in desktop and networked environments.

TECHNICAL SKILLS

Operating Systems

- Linux (installation, configuration, basic hardening)
- Windows (basic troubleshooting, general computer tasks)

System Administration

- User and permission management
- Package management (APT)
- Python / Bash scripting
- File systems, backups, and storage concepts

Tools & Platforms

- Git & GitHub
- SQL (MySQL & SQLite)
- Raspberry Pi

Networking

- LAN setup and basic troubleshooting
- IP addressing, subnet basics
- Router/Wi-Fi configuration (SSID, MAC filtering)

Software

- Visual Studio Code
- Google Workspace
- Microsoft 365

Other Skills

- Hardware and peripheral troubleshooting
- Technical documentation
- End-user support

RELEVANT PROJECTS

Linux System Administration Practice (Self-Directed)

- Installed and configured Ubuntu/Lubuntu on personal systems
- Practiced user management, package installation, and service control
- Performed system monitoring and basic troubleshooting using CLI tools

Raspberry Pi Projects

- Worked with Raspberry Pi for basic system setup and peripheral integration
- Developed a garbage collecting and segregating robot with Raspberry Pi as the microcomputer.

File Synchronization Setup (rclone & Syncthing)

- Configured rclone for secure file synchronization and backups between local and remote systems
- Deployed Syncthing to enable real-time, peer-to-peer file syncing across multiple devices

Time in - Time out system (MS Excel)

- Developed an excel file to automatically calculate hours worked

File Organizer Application (Python)

- Developed a desktop tool to automatically categorize and manage files

WORK EXPERIENCE

Computer Engineering Intern at University of Santo Tomas-Legazpi

- Provided technical support and troubleshooting for organization-wide hardware (desktops/laptops) and software.
- Resolved network and device issues, including printer maintenance, preventive care, and system configurations.
- Documented technical procedures and recurring issues to streamline team knowledge sharing.

EDUCATION

Bachelor of Science in Computer Engineering

University of Santo Tomas-Legazpi

Graduated: 2025

CERTIFICATIONS

- Python Certification – SoloLearn
- Responsive Web Design – FreeCodeCamp
- Networking Certification – TESDA
