PROFESSIONAL SUMMARY

Detail-oriented Computer Engineer focused on Linux systems administration, Embedded Systems, and Data Analysis. Proven ability to create and deploy automated solutions and troubleshoot hardware/software issues. Experienced in schematic & circuit diagram design and technical documentation.

TECHNICAL SKILLS

Operating Systems

- Linux
- Windows

Embedded Systems

- Machine Learning
- Microcontroller Programming
- Circuit & Schematic Diagram Design

Programming Languages

- Python
- Java

Other Skills

- Hardware & Software Troubleshoot
- Technical Documentation

RELEVANT PROJECTS

Garbage Collecting & Segregating Robot

- Developed a garbage-collecting and segregating robot with Raspberry Pi as the microcomputer and Python as the programming language.
- Integrated a YOLOv5-based object detection system to identify and categorize waste types in real-time for automated robotic segregation.

Daily Time Record

- Created an Excel worksheet to calculate hours worked automatically.
- Utilized a combination of different Excel formulas such as IF, MIN, and MAX to perform the calculation for hours worked

File Organizer

- Created a file organizer by leveraging the scripting capabilities of Python.
- It has two modes: a general file organizer used for general-purpose organizing and a name-based organizer used for organizing personal documents of an individual.

WORK EXPERIENCE

Computer Engineering Intern

University of Santo Tomas-Legazpi

March 2025 - May 2025

- Provided technical support and troubleshooting for organization-wide hardware and software.
- Resolved network and device issues, including printer maintenance, preventive care, and system configurations.

Insurance Processor

Accenture

April 2026 - Present

- Verified health and dental insurance eligibility by evaluating submitted legal documentation from corporate clients and enrolling employees.
- Developed a custom Excel automation tool tailored to the workflow, significantly boosting processing speed and reducing errors.

EDUCATION

Bachelor of Science in Computer Engineering

University of Santo Tomas-Legazpi

July, 2021 - June, 2025

CERTIFICATIONS

- *Introduction to Python* – SoloLearn
- *Responsive Web Design* – FreeCodeCamp
- *Setting Up Computer Networks* – TESDA
